Annual Survey of Social Work Programs: Baccalaureate Programs

Welcome to the 2008 Annual Survey of Social Work Programs for baccalaureate programs. The annual survey collects information about baccalaureate programs, faculty, students, and graduates. CSWE reports on this information, which is used by the social work education community in research, program planning, and advocacy work. Your participation is critical to helping us to have a complete picture of social work education.

CSWE is continuing to streamline the annual survey data collection process to reduce the time burden for programs. This year, you will find fewer questions and more 'data check points' to help you confirm the accuracy of your reporting as you are completing the forms. The [Annual Program Statistics](#) section of the CSWE Web site includes 'download' ready forms and FAQ about the 2008 instrument. If you have any questions or concerns, please contact the Office of Social Work Education and Research, by e-mail (abediako@cswe.org) or phone (703.519.2054). Thank you in advance for participating in this important process.

Benchmarking Service

In recent years, many social work programs have felt increasing pressure from their institutions to provide data comparing their program to 'peer institutions'. While CSWE has long provided program level data about the number of enrolled students, graduates, and faculty members, much of the data submitted in the Annual Survey has only been reported in aggregate format. In order to be responsive to the needs of our program members, this year we are beginning a new benchmarking service.

The benchmarking service will use key questions that are already being asked in the Annual Survey in addition to several new questions that will be central to this service. The questions were identified by the NADD Benchmarking Committee, which included members of BPD and GADE. Programs that agree to participate in the benchmarking project will receive a specialized report with the results of the benchmarking questions. In addition, they will be eligible to request an individualized report comparing their results to the benchmarking questions to those of six program-identified peer institutions. The individualized reports will have a small fee attached to cover CSWE staff time in report development. Programs can participate in the benchmarking project without requesting the individualized reports.

CSWE will always protect confidential information submitted by programs, so individual faculty member salaries will never be given out to other programs. Salary information will be reported in aggregate and not reported for cases when less than five faculty members are in a single category.

For a list of all the questions included in the benchmarking service, please see the CSWE Web site. If you have any questions, feel free to contact the Office of Social Work Education and Research (abediako@cswe.org).
