

October 5, 2011

Dear Representative,

We write to thank you for co-sponsoring **H.R. 2954 - the Health Equity and Accountability Act (HEAA) of 2011**, introduced on September 15, 2011. We thank you for your work and leadership on issues important to the health and well-being of minority communities in the United States. The Congressional Tri-Caucus (made up of the Congressional Black Caucus, the Congressional Hispanic Caucus and the Congressional Asian Pacific American Caucus) has long championed this bill and we support their efforts in the 112th Congress.

Last year, we celebrated the enactment of the Affordable Care Act (ACA), the historic health reform law. Our communities stand to benefit from a number of the provisions of the law including immediate relief for many minority-owned small businesses through the small business health tax credit; improved access to health insurance for millions of individuals – particularly those with pre-existing conditions - through the insurance market reforms and the creation of new health insurance exchanges in 2014; the Department of Health and Human Services' (HHS) release of new draft standards for collecting and reporting on race, ethnicity, sex, primary language and disability status, as well as the Department's plans to begin collecting additional data on sexual orientation and gender identity; and Medicaid expansion.

In addition, the ACA put in place infrastructure to address disparities through the establishment of Offices of Minority Health in the Food and Drug Administration (FDA), Centers for Medicare and Medicaid Services (CMS), Centers for Disease Control (CDC), Substance Abuse and Mental Health Services Administration (SAMHSA), Agency for Health Care Research and Quality (AHRQ) and the Health Resources and Services Administration (HRSA). CMS has begun to pave the way to improving the quality and value of our health care system through the creation of the Center for Medicare and Medicaid Innovation and the Federal Coordinated Health Care Office.

The Health Equity and Accountability Act of 2011 recognizes that additional steps must be taken to specifically address health care disparities and provides additional tools necessary to address and eliminate health and health care disparities experienced by minority and underserved communities. The HEAA focuses on ensuring that a full range of culturally and linguistically appropriate health care and public health services are available and accessible in every community, creates additional pipeline and training opportunities for minority-serving professional and allied health care workers, and incorporates strategies to address a range of disease-specific, mental and behavioral health issues facing minority communities.

We also support the provisions in the HEAA that seek to further eliminate existing access barriers to affordable health insurance coverage, promote investments in innovative health care delivery methods and technologies, and advance research and data collection about the health needs and outcomes of our communities. These are all important steps towards eliminating racial and ethnic health disparities, and creating a sustainable health care system that can pave the road to health equity.

As organizations committed to reducing racial and ethnic health disparities, including the subpopulations within communities of color that face multiple barriers due to factors such as immigration status, age, disability, sexual orientation, gender identity and limited English proficiency, we

thank you for co-sponsoring this important piece of legislation. The undersigned, many of whom have supported this legislation in the past, are ready to offer our expertise and networks to work with you to advance health equity. Please contact Priscilla Huang (phuang@apiahf.org) with any with any questions.

Sincerely,

AARP
