

INTRODUCTION

This report presents the results of a survey of all baccalaureate and master's degree programs in social work accredited by the Council on Social Work Education in September 2006.

In the fall of 2006 all accredited programs and programs in candidacy were asked to complete an online survey. A call for statistics was sent electronically or through regular mail to all chief administrators of social work degree programs followed by reminders. Response rates increased dramatically in 2006.

Table 1 shows the survey response rate for 2006. There has not been a 100% response rate from programs since 1982. This should be taken into consideration when comparing the aggregated data in this report with those in previous years.

TABLE 1
Number of Responses to the 2006 Survey

Schedule	Number Sent	Number Completed	Percent Completed
Institutional Data	509	484	95.1
Baccalaureate Program	458	433	94.5
Master's Program	181	173	95.6
Doctoral Program	69	61	88.4
Faculty	509	480	94.3

Many factors have influenced the presentation of this report. Due to rounding decimals to one or two places, percent totals or sub-totals within tables may not reflect the exact sum of the numbers preceding them. Also, totals in tables may not correspond with one another due to the variation in response rates. In some cases, programs chose not to respond to a particular item in the survey. Lists of accredited baccalaureate and graduate social work degree programs may be found in Appendices B and C.

The geographic distribution of social work education programs and faculty (see Table 2) remains virtually unchanged from year to year. The mid-western states (Region 5) have the highest concentration of social work education programs and faculty. When considering the number of faculty reported in these tables, one should remember that programs were asked to respond with information about all faculty members in their program, regardless of position (e.g., full-time, part-time, adjunct, tenure).

TABLE 2
Social Work Education Programs and Faculty, by Geographic Region and Level of Program, 2006

*3 Combined programs and 1 BSW only program did not complete any information on faculty, full-time or part-time.

Region 1—Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont

Region 2—New Jersey, New York, Puerto Rico, Virgin Islands

Region 3—Delaware, District of Columbia, Maryland, Pennsylvania, Virginia, West Virginia

Region 4—Alabama, Florida, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Tennessee

Region 5—Illinois, Indiana, Michigan, Minnesota, Ohio, Wisconsin

Region 6—Arkansas, Louisiana, New Mexico, Oklahoma, Texas

Region 7—Iowa, Kansas, Missouri, Nebraska

Region 8—Colorado, Montana, North Dakota, South Dakota, Utah, Wyoming

Region 9—Arizona, California, Hawaii, Nevada, Guam

Region 10—Alaska, Idaho, Oregon, Washington

Institutional Characteristics

Table 3 shows that the majority of social work education programs are located in public state institutions, employing 62.7% of all social work faculty members.

TABLE 3

* 3 combined public – state programs and 1 private denominational BSW ONLY program did not complete faculty information

As noted in Table 4, graduate and combined programs are most likely to be found in institutions with 10,000 or more full-time students. Conversely, stand-alone baccalaureate programs are most often found in institutions with full-time enrollments of less than 5,000.

TABLE 4
Social Work Education Programs, by Size of College/University Enrollment and Level of Program*

Full-Time Enrollment	Level of Program			
	Master's Only	Combined	Baccalaureate Only	Total
Under 2,000	15	17	107	139
2,000–4,999	4	6	91	101
5,000–9,999	5	15	57	77
10,000–19,999	8	29	32	69
20,000–29,999	4	26	7	37
30,000 and Over	6	11	3	20
*Missing Enrollment	*7	*22	*12	*41
Total	49	126	309	484

Institutional Diversity

In 2006, 38 accredited baccalaureate social work programs and 12 master's of social work programs were housed in Historically Black Colleges and Universities. An additional 31 baccalaureate and 15 master's social work programs were located within schools listed as Hispanic Serving Institutions. The percentage of programs reporting as non-ethnic, co-educational institutions dropped from 86.4% in 2004 to 84% in 2006.

Number of Faculty

Stand-alone baccalaureate programs typically have faculties numbering fewer than 10. There are no stand-alone baccalaureate programs with 30 or more faculty members. Larger faculties are characteristic of combined master's/baccalaureate and stand-alone graduate programs.

TABLE 5
Social Work Education Programs, by Number of Full-Time Faculty and Level of Program*

Number of Faculty	Level of Program			
	Graduate Only	Combined	Baccalaureate Only	Total
1	0	0	1*	1
2	0	1*	49	50
3-5	0	0	169	169
6-9	8	5	57	71
10-19	12	58	30	101
20-29	11	32	2	44
30-39	10	8	0	18
40-49	3	7	0	10
50-59	2	4	0	6
60 and over	3	8	0	11
Missing Faculty Data	0	3	1	4
Total	49	126	309	484

*Two programs, one combined and one baccalaureate, reported fewer faculty than is required under Accreditation Standards (2 FT for BSW programs and 6 FT for MSW programs). This was most likely a mistake in the reporting.

TABLE 6
Social Work Education Program, by number of Full-Time Students and Level of Program

Number of Full-Time Students	Level of Program

Total	49	124	124	309

SOCIAL WORK FACULTY

Data on faculty were received from all accredited programs. Programs were asked to report every faculty member regardless of their position or time spent in the program. Although programs reported on 8,603 faculty members, the data received on many faculty members were incomplete or inaccurate. For example, 112 faculty cases were listed with 0% time to social work education and therefore were removed from our analysis, and 21 faculty cases were duplicates listed for two schools engaged in a collaborative. There were an additional 388 faculty cases whose institutions failed to complete any programmatic information. These faulty cases were not included in the following tables, so none of the tables will show information on all of the faculty members reported by programs. After removal of these cases we utilized the remaining 8,082 faculty cases for the analysis to follow. Care should be taken when comparing the data among tables because of the various response rates.

One part of the survey asked programs to report the percentage of a full-time equivalent (FTE) each faculty member spent in social work education and other institutional responsibilities. For this report, “full-time” refers to those faculty members who spend 50% or more of an FTE in social work education.

Time in Social Work Education

TABLE 7

Faculty, by Type of College/University Appointment, Level of Program, and Percent of Time in Social Work Education

Percent of Time in Social Work Education	Type of College/University Appointment	Level of Program

None	NA	NA	257	5.9	
Total	2,997	100.0	4,340	100.0	

Seventy-three of the graduate programs offer a doctoral program.

TABLE 9
Full-Time Faculty in Programs Offering Doctoral Social Work Education,
by Percentage of Time Assigned to Doctoral Level*

Percent of Time Assigned to Doctoral Level	#	%
0%	1,956	75.1
1–24%	335	12.8
25–49%	185	7.1
50% and over	130	5.0
Total	2,615	100.0

*Column totals may not correspond among tables within this report due to variance in response rates.

Missing—8 schools with doctoral programs did not complete this information.

Demographic Characteristics

The following tables display various demographic characteristics of social work faculty, including age, gender, ethnic/racial group identification, highest earned degree, rank, primary responsibility within the social work program, tenure, and salary.

Age, Gender, and Racial/Ethnic Group Identification

TABLE 10
Faculty, Gender by Level of Program

Years on Full-Time Faculty

Table 24 displays the number of years social work faculty members were reported to have been on full-time status in the social work program. The survey did not specify the definition of “full-time.” It is interesting to note that of the newly hired faculty members about two-thirds of the graduate and combined program faculty members were hired at the non-professorial ranks. This may indicate a tendency of programs to hire more temporary or adjunct faculty.

TABLE 24

Salary

Data were gathered on the salaries and number of months covered by said salary for full-time social work faculty. Though 2,126 full-time faculty listed having the rank of assistant professor, associate professor, and professor, 34 of those did not include information on number of months salary covered. Because of this they were omitted from Table 27, which displays the median salaries and middle 50% range of salaries of 2,092 non-administrative faculty by rank and region. Medians are reported here because of the wide range of salaries reported. All salaries reported in Table 27 are adjusted to reflect a nine-month academic year, salary data reported for periods other than nine months were increased or decreased proportionately. Medians and ranges are shown for regions that reported at least four cases at a particular level. This section of the survey may have been reported inaccurately or not reported at all; therefore, care should be taken when examining data, especially when comparing salary data from year to year.

One of the factors influencing the data in the salary tables is the definition of “full-time” as those faculty members who spend at least 50% of a full-time equivalent on social work education responsibilities. Therefore, a \$15,000 salary likely belongs to a faculty member who only spends half the time of his/her colleague who has a full teaching load. Variables such as time spent in the social work program, months on which the salary is based, and the salary itself are all used to determine the cases and salaries presented in Tables 27–29, and respondents may have reported incorrect data for one or more of the variables. For example, respondents may have incorrectly input the time spent in the program for a part-time faculty member at 100% of an FTE when they perhaps should have input 25%. Some of the adjusted salaries in Tables 27–29 are under \$15,000.

* Less than 4 cases reported.

Table 28 shows the median salaries reported for full-time faculty members according to their primary responsibility within the social work program. One column displays the actual salaries received by faculty members regardless of the number of months it took them to earn that salary. The other column displays the same salaries adjusted to a 9-month academic year as was done in Table 22. Please note that some faculty members were not included in the adjusted salary column because they lacked information needed to complete the calculation (e.g., months salary covered).

TABLE 28

Table 29 shows the median salaries (adjusted to reflect a 9 month salary) reported for full-time faculty members according to their administrative title within the social work program. The dean's/directors (chief administrators), doctoral program directors, and research directors at the graduate and combined program levels report the highest median salary. At the baccalaureate level, chief administrators reported the highest median salary. The ranges displayed highlight the data entry errors noted earlier.

Table 29
Median Salary and Salary Range of Administrators, by Rank and Level of Program, as of November 1, 2006*

Level of Program	Title	Salary

Table 27 compares the median salaries of full-time non-administrative faculty members broken down into categories representing ethnicity, gender, highest earned degree, and rank. In general, female faculty members receive lower salaries than do their male counterparts. Faculty holding master's degrees as their highest earned degree tend to have lower salaries than do their colleagues with doctorates holding the same rank and ethnicity. Comparisons within this table are difficult, given the varying numbers of cases reported among categories.

TABLE 30

† Salary data are adjusted for a 9-month academic year.

Number of Publications

Programs were asked to report on the number of faculty publications that actually appeared in print during the preceding academic or calendar year, whichever year conforms to their record-keeping system. The five categories of publications were defined as refereed articles, books published by formal publishing companies, published book chapters and published conference proceedings, external reports/monographs, and book reviews. To adjust for multiple authorships, respondents were asked to enter the fraction of authorship undertaken by the faculty member. For example, a faculty member who wrote an article with another colleague would be reported as having written 0.5 of an article. Instead of reporting on the mean number of publications per faculty member, as has been done in the past, since 2004, CSWE has reported on the number of faculty by type of publication, and number of publications.

Table 31
Number of Faculty Published, by Program Level and Type of Publication.

BACCALAUREATE STUDENTS

In 2006, 433 of 458 baccalaureate programs (94.5%) responded to the Annual Survey on Social Work Programs. Most of the tables in this section report data only on juniors and seniors to maintain continuity with previous years' reports and because some programs do not allow students to declare majors until their junior year. Also, due to the deadline for statistics, many programs do not have access to data showing the major declaration of incoming freshmen. It should be noted that responses were incomplete in some portions of the survey.

Applications and Admissions

Programs were asked to report the number of applications that were received and considered and accepted. No definitions or direction for completion were given. Baccalaureate programs reported that 18,745 applications were received and considered and 14,743 (78.7%) were accepted.

Enrollment

Programs were asked to report student enrollment as of November 1, 2006. A total of 42,095 full-time students (reported freshman, sophomore, junior, and senior) (J&S 27,408) and 6,915 part-time students (J&S 5,049) were enrolled as of November 1st in the 2006-2007 academic year. Social work programs reported full-time and part-time enrollment based on their own institutional definitions.

To compensate for the missing programs' data, a statistically projected total full-time enrollment for 2006 is 26,071. This projection assumes that the mean of the responding programs' enrollments, minus the five highest values, is the value of the missing programs' enrollments. A total of 8 programs didn't respond to survey, 1 respondent was missing enrollment data. More specifically, the adjustment calculations are the number of missing programs multiplied by the mean (in this instance 9 missing programs times the mean of 129).

TABLE 32

Field Instruction

Baccalaureate students' field instruction settings are reported in Table 34. More than half of the students were listed as not yet assigned field instruction or not to be in field instruction this academic year. It is likely that most of these students are juniors who typically do not appear in field until their senior year. Of those in field, child welfare, family services, school social work, and aging/gerontological social work are the most common settings.

TABLE 37

Juniors and Seniors Enrolled on 11/1/06, by Primary Field in Field Instruction

Financial Aid

Table 38 shows the different sources of the financial aid received by full-time Junior & Senior students as of November 1, 2006. This represents all awards made, regardless of number of sources. For example, if one student represented in Table 38 received an award from three different sources, that student would be counted three times in Table 39.

MASTER'S STUDENTS

Data in this section were gathered from programs with accreditation. Program data are listed individually in Appendix A. For the 2006 collection year, 173 out of 181 accredited programs responded to the annual survey (95.6%), which represents the highest response rate in 10 years.

Applications and Admissions

Enrolled	1,525	65.2	2,494	46.7	4,019	52.4

Enrollment

Programs were asked to report student enrollment as of November 1, 2006. A total of 42,095 students (reported freshman, sophomore, junior, and senior) (J&S 27,408) full-time students and 6,915 (J &S 5,049) part-time students were enrolled as of November 1st in the 2006-2007 academic year. Social work programs reported full-time and part-time enrollment based on their own institutional definitions. To compensate for the missing programs' data, a statistically projected total full-time enrollment for 2006 is 26,071. This projection assumes that the mean of the responding programs' enrollments, minus the five highest values, is the value of the missing programs' enrollments. In addition, 8 programs didn't respond to survey.

TABLE 45
Students Enrolled in Master's Programs 1978–2006

Dual Degrees

TABLE 50
Number of Students reported in a dual degree program.

Dual Degree	# Schools Reporting	# Students Reported
Business	9	15
Education	6	36
Law (J.D.)	25	64
Social Work Doctorate	8	49
Public Administration	12	69
Public Health	18	150
Theology/Divinity	18	117
Urban Planning	4	14
Other	25	167
Total	56*	681

*Please note this number is an unduplicated count of the total number of programs that listed having 1 or more students in at least one dual degree program. Many of these programs have multiple dual-degree offerings.

Concentration of Study

Data were gathered on the primary methods concentration of master’s degree students enrolled in schools of social work. The survey did not define any of the “methods of practice categories” or “fields of practice or social problem categories.” Programs were asked to place student information in cells that represented “methods” and “social problems.”

TABLE 51
Master's Degree Students Enrolled on 11/1/06, by Primary Methods Concentration*

Methods	Concentration Framework							
	Methods Only		Methods Combined with Field of Practice or Social Prob.		Field of Practice or Social Problem Only (No Methods)		Total	
	#	%	#	%	#	%	#	%

Field Instruction

Although students may choose to study a particular field of practice or social problem, the location of their field instruction may not correspond with their study concentration. Table 53 shows the primary field concentration in a field placement, in which master's students were placed on November 1, 2006.

TABLE 53
Master's Students Enrolled on 11/1/06, by Primary Field of Practice in Field Instruction

Type of Concentration	#	% within Field Instruction	% all enroll
Aging/Gerontological Social Work	1,742	6.5	4.4

Financial Aid

Table 55 shows the different sources of the financial aid received by full-time master's students as of November 1, 2006. This represents all awards made, regardless of number of sources. For example, if one student represented in Table 54 received an award from three different sources, that student would be counted three times in Table 55.

Degrees Awarded

This year responding programs reported 17,209 master’s degrees awarded. Applying the same projection methodology used to compensate for missing data to estimate total full-time enrollment (described on page 37), the total number of master’s degree graduates for 2006 is estimated to be 17,913. A total of 8 programs didn’t respond to survey.

TABLE 56

Student-Faculty Ratio

Table 49 displays student–faculty ratios for master's programs. For the purpose of calculating ratios, full-time students were counted as one and part-time students were counted as one-half. In 2004 instead of using the previous system of counting faculty based on the percentage of time in social work at each level, faculty were counted similarly to students based on whether they fell under full-time or part-time. Faculty were included in the calculations below only if they were from a program listed as Graduate only or Combined, and had greater than 0 % FTE within the Master’s program.

TABLE 59

Student–Faculty Ratio in Master's Programs on 11/1/06

2004	1,724	100.0	1,580	91.6	711	41.2	457	26.5

Enrollment

In 2006 programs were asked to report data on students who are taking coursework and those who have completed coursework, in addition to their full-time and part-time status. Numbers from 2000 through 2004 may be used to compare with earlier years by adding the two full-time and two part-time columns together. There is no way to know, however, if programs reported students in the same way in 1977–1999.

TABLE 61

PROGRAMS IN CANDIDACY FOR ACCREDITATION

To maintain continuity with previous years' reports, the programs in candidacy for accreditation are reported separately here with fewer tables. Forty-three programs in candidacy were surveyed (February 2006 program statistics). Fifteen baccalaureate programs and 18 master's programs responded with data.

TABLE 70

Tables 72 and 73 display selected characteristics of social work education over the last five years. General trends may be seen in these displays, but they must be interpreted with caution. During the last twenty-five years, the response rate has not been 100% on any survey except for the doctoral surveys, which were 100% in 1991. As noted earlier, response rates to specific items also vary within schedules.
