## **2022 EPAS | INTERPRETATION GUIDE**

*for Baccalaureate and Master's Social Work Programs*  
**version 9.3.2025**

This official companion document to the [2022 Educational Policy and Accreditation Standards \(EPAS\)](#) provides programs with information for navigating the accreditation process and understanding the [Board of Accreditation's \(BOA\)](#) intent and interpretation of the EPAS.

As baccalaureate and master's social work education programs continue [2022 EPAS](#) implementation, the BOA and the Department of Social Work Accreditation (DOSWA) publish resources, conduct [training](#), and offer year-round [consultative services](#) to support accreditation efforts.

### **Purpose of the Interpretation Guide:**

- Further clarify the BOA's expectations for programs to meet each accreditation standard.
- Provide guidance for developing clear and concise written compliance narratives in accreditation documents.

### **How to Use This Guide:**

- Use the table of contents below to navigate to the section of your choice.
- If searching for a specific standard, perform a search/find to locate the standard quickly.
- Use this guide as a final checklist before submitting a document to the BOA to ensure each component of each standard is clearly addressed in the narrative.
  - The primary reason for a citation is that the narrative fails to clearly address one or more components of the standard.

### **Please Note:**

- Accreditation information is subject to change. This guide will be periodically updated by the BOA and DOSWA.
- When updates occur, programs' primary contacts are notified, the guide is posted publicly on [CSWE's website](#), and **recent clarifications are highlighted**.
- Clarified interpretations are effective immediately.
- Always confirm that the program utilizes the most current version of this document when implementing the 2022 EPAS and/or writing an accreditation document by visiting the accreditation webpages at [www.cswe.org](http://www.cswe.org).
- Programs are solely responsible for implementing, demonstrating, and maintaining compliance with the EPAS at all times.

## UNDERSTANDING ACCREDITATION

Accreditation is a system for recognizing educational institutions and professional programs affiliated with those institutions for a level of performance and integrity based on review against a specific set of published criteria or standards. The process includes the submission of a self-study document that demonstrates how standards are being met, an onsite review by a selected group of peers, and a decision by an independent board or commission that either grants or denies accredited status on the basis of how well the standards are met.

The purposes of accreditation are:

- Quality assurance
- Academic improvement
- Professional preparation
- Public accountability

Accreditation is a developmental, reflective, and renewal process by which program stakeholders craft educational experiences to prepare competent social work practitioners. The process expands beyond quality control, and can be the impetus for innovation, experimentation, and program improvement. While accreditation is reviewed at periodic intervals, programs are expected to maintain compliance between review cycles.

Accreditation is a peer-review process, accomplished via dedicated volunteer contributions of the Board of Accreditation (BOA) members and site visitors. The DOSWA staff liaise between the BOA and the program, providing services, education, and training opportunities; disseminating accreditation policies and procedures; and furnishing BOA decision letters to programs.

CSWE's BOA is recognized by the Council on Higher Education Accreditation (CHEA) to accredit baccalaureate and master's degree programs in the United States and its territories.

The professional judgments of the BOA are based on the Educational Policy and Accreditation Standards (EPAS) developed by the Commission on Educational Policy (COEP) and the BOA.

As a CHEA-recognized programmatic accrediting body, the BOA, and their partnership with COEP, are responsible for revising the EPAS at periodic intervals not to exceed seven (7) years.

The BOA is composed of fellow social work educators, practitioners, and one public member. Commissioners are volunteers with a background in social work education, active CSWE membership with at least two-years site visitor experience, and are appointed for three-year terms.

The BOA convenes three (3) times per year: February, June, and October/November.

The BOA is the sole and final arbiter of compliance. Social work programs are solely responsible for implementing, demonstrating, and maintaining compliance with the 2022 EPAS.

## Educational Policy 1.0 — Program Mission

The program mission reflects a process informed by a commitment to student attainment of the nine social work competencies. It is grounded in the profession's purpose and in the core values of the social work profession and informed by the program's context.

### Purpose

The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social, racial, economic, and environmental justice; the creation of conditions that facilitate the realization of human rights; the elimination of poverty; and the enhancement of life for all people, locally and globally

### Values

Service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry are among the core values of social work. These values, along with an anti-racist and anti-oppressive perspective, underpin the explicit and implicit curriculum and frame the profession's commitment to respect all people and the quest for social, racial, economic, and environmental justice.

### Program Context

Program context encompasses the needs and opportunities of practice communities, which are informed by their historical, political, economic, environmental, social, cultural, demographic, institutional, local, regional, and global contexts and by the ways they elect to engage these factors. Additional factors include new knowledge, technology, and ideas that may have a bearing on contemporary and future social work education, practice, and research.

## Educational Policy 2.0 — Anti-Racism, Diversity, Equity, and Inclusion (ADEI)

Social work programs integrate anti-racism, diversity, equity, and inclusion (ADEI) approaches across the curriculum. Programs provide the context through which students learn about their positionality, power, privilege, and difference and develop a commitment to dismantling systems of oppression, such as racism, that affect diverse populations. Programs recognize the pervasive impact of White supremacy and privilege and prepare students to have the knowledge, awareness, and skills necessary to engage in anti-racist practice. The dimensions of diversity, equity, and inclusion are understood as the intersectionality of multiple factors including but not limited to age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion/spirituality, sex, sexual orientation, and tribal sovereign status. Faculty and administrators model anti-racist and anti-oppressive practice and respect for diversity and difference. Faculty and administrators also foster an equitable and inclusive learning environment by facilitating important ADEI discourse. The program's commitment to ADEI is reflected in its explicit and implicit curriculum. Together the implicit and explicit curricula are informed by the program context and learning environment. The program recognizes the important role of the learning environment in the education of program participants, especially with respect to the value and meaning of anti-racism, diversity, equity, and inclusion, and the development of cultural humility. The program has an inclusive approach to addressing the vast range of student learning needs, including intentional planning and implementation of inclusive practices and pedagogies in the explicit curriculum that reduce barriers while optimizing accessibility and equity for students. Students are responsible for their learning, collaborating with peers and colleagues, and practicing with historically and currently oppressed populations through an anti-racist lens.

## **Educational Policy 3.0 — Explicit Curriculum**

The explicit curriculum is the program's design and delivery of formal education to students, and it includes the curriculum design, courses, course content, and field education curriculum used for each of its program options. Social work education is grounded in the liberal arts and a commitment to anti-racism, diversity, equity, and inclusion, which together provide the intellectual basis for the professional curriculum and inform its design. The integration of anti-racism, diversity, equity, and inclusion principles across the explicit curriculum includes anti-oppression and global positionality, interdisciplinary perspectives, and comparative analysis regarding policy, practice, and research. Using a competency-based education framework, the explicit curriculum prepares students for professional social work practice at the baccalaureate and master's levels. Baccalaureate programs provide students with strong generalist practice knowledge, values, skills, and cognitive and affective processes that prepare them for professional practice with individuals, families, groups, organizations, and communities. Master's programs provide students with knowledge, values, skills, and cognitive and affective processes at both generalist and specialized levels that prepare them for professional practice with individuals, families, groups, organizations, and communities. The explicit curriculum, including field education, fosters a learning environment and engaged learning methods informed by guidance from the professional practice community. Design and delivery of the explicit curriculum incorporate experientially based learning opportunities informed by teaching that includes digital and information literacy and technology-supported learning. The program's commitment to continuous curriculum improvement is guided by evolving contemporary science and interprofessional research.

## **Educational Policy 3.1 — Generalist Practice**

The baccalaureate and master's programs in social work prepare students for professional practice at a generalist level. The descriptions of the nine social work competencies presented in the EPAS identify the knowledge, values, skills, and cognitive and affective processes that are subsequently demonstrated in students' observable behaviors indicative of competence at a generalist level of practice. Generalist practice is grounded in the liberal arts and the person-in-environment framework. To promote human and social well-being, generalist practitioners use a range of prevention and intervention methods in their practice with diverse individuals, families, groups, organizations, and communities, based on scientific inquiry and best practices. The generalist practitioner identifies with the social work profession and applies ethical principles and critical thinking in practice at the micro, mezzo, and macro levels. Generalist practitioners engage diversity in their practice and advocate for human rights and social, racial, economic, and environmental justice. They recognize, support, and build on the strengths and resiliency of all human beings. They engage in research-informed practice and are proactive in responding to the impact of context on professional practice.

## **Nine Social Work Competencies**

**Competency 1:** Demonstrate Ethical and Professional Behavior

**Competency 2:** Advance Human Rights and Social, Racial, Economic, and Environmental Justice

**Competency 3:** Engage Anti-Racism, Diversity, Equity, and Inclusion (ADEI) in Practice

**Competency 4:** Engage in Practice-Informed Research and Research-Informed Practice

**Competency 5:** Engage in Policy Practice

**Competency 6:** Engage with Individuals, Families, Groups, Organizations, and Communities

**Competency 7:** Assess Individuals, Families, Groups, Organizations, and Communities

**Competency 8:** Intervene with Individuals, Families, Groups, Organizations, and Communities

## Educational Policy M3.2 — Specialized Practice

The master’s program in social work prepares students for specialized practice. Specialized practice builds on generalist practice as described in Educational Policy 3.1 by integrating the nine social work competencies that manifest in holistic professional practice. Specialized practitioners extend and enhance social work knowledge, values, skills, and cognitive and affective processes, and demonstrate an ability to engage, assess, intervene, and evaluate across client populations, problem areas, and methods of intervention. In each area of specialized practice defined by the program, the program extends and enhances the nine social work competencies that are demonstrated in observable behaviors indicative of competence in specialized areas of professional practice. Specialized practitioners synthesize and use the knowledge and skills necessary for interprofessional collaborations based on scientific inquiry and best practices, consistent with social work values. They engage in both research and advocacy in their commitment to changing structural inequities and to informing and improving practice, policy, and service delivery.

## Educational Policy 3.3 — Signature Pedagogy: Field Education

Field education is the signature pedagogy for social work. Signature pedagogies are elements of instruction and socialization that teach future practitioners the fundamental dimensions of professional work in their discipline: to think, to perform, and to act intentionally, ethically, and with integrity.

The field setting is where students apply human rights principles from global and national social work ethical codes to advance social, racial, economic, and environmental justice. It fosters a learning environment where anti-racism, diversity, equity, and inclusion are valued. Field education is designed to integrate the theoretical and conceptual contributions of the explicit curriculum in the field setting. It is a basic precept of social work education that the two interrelated components of curriculum—classroom and field—are of equal importance, and each contributes to the development of the requisite competencies of professional practice. Field education is systematically designed, supervised, coordinated, and evaluated based on criteria and measures of student acquisition and demonstration of the nine social work competencies. Responding to the changing nature of the practice world and student demographics and characteristics, field education programs articulate how they maintain or enhance students' access to high-quality field practicum experiences. Field education programs develop field models to prepare students for contemporary and interprofessional social work practice, including the use of various forms of technology.

The program's field education director serves as an essential contributor to the curricular development, administration, and governance of field education.

Field education supervision may be provided by the same supervisor if field education supervision is distinct from employment supervision and the supervisor meets the requirements of Accreditation Standard 3.3.6. ## **Educational Policy 4.0 — Implicit Curriculum**

The implicit curriculum consists of the student learning experience and the program context or environment. The implicit curriculum includes the following elements: student development, admissions, advising, retention, and termination; student participation in governance; faculty; administrative and governance structure; and resources. All elements of the implicit curriculum are expected to demonstrate the program's commitment to anti-racism, diversity, equity, and inclusion (ADEI). The culture of human interchange, the spirit of inquiry, the support for difference and diversity, and the values and priorities in the educational environment, including the field setting, inform the student's learning and development. These elements are manifested through policies that are equitable and transparent in substance and implementation, the qualifications of the faculty, and the distribution of resources. The student learning experience and environment are as important as the academic curriculum in shaping the professional character and competence of the program's graduates.

## **Educational Policy 4.1 — Student Development**

Programs recognize the need to support student development both in and out of the classroom. Both aspects of the learning environment manifest holistic characteristics that communicate the values, commitments, priorities, and culture of the program and the institution. Thus, a program's commitment to student development includes program structures and resources that facilitate student participation and input into the development and delivery of the explicit and implicit curriculum. The professional development of the student requires a program's commitment to adequate resources from admission through graduation. These resources include clear admissions, advising, retention, and termination policies that reflect the program's commitment to ADEI. Programs also recognize the need to resource student-centered activities and initiatives designed to further student professional identity and comportment as well as student preparation for professional practice. These resources include but are not limited to academic advising, career services, alumni services, networking and mentoring opportunities, licensure preparation, and community engagement and advocacy opportunities.

## Educational Policy 4.2 — Faculty

Appropriate and qualified faculty representing diverse perspectives are essential for developing an educational environment that promotes, emulates, and teaches students the knowledge, values, and skills expected of professional social workers. Through their teaching, research, scholarship, and service—as well as their interactions with one another, administration, students, and community—the program’s faculty model the behavior and values expected of professional social workers in the context of ADEI. Faculty are available to function as appropriate role models for students in their learning and socialization into the discipline and profession. Faculty incorporate recognition of the program’s essential functions, which may include recruitment; enrollment; advising; student engagement; retention; curriculum development; teaching; research; scholarship; mentorship; oversight of student research; assessment; service on institutional or program committees; field education support and program management; appropriate class sizes and sufficient course offerings to meet program aims; and monitoring and evaluation of student progress.

Faculty demonstrate sufficient educational qualifications and experience related to the nine social work competencies. Programs demonstrate that faculty are qualified to teach the courses to which they are assigned. Learning experiences are to be designed, delivered, and assessed by faculty (full- or part-time) or other appropriate professionals who are qualified for the positions they hold and the work they do. Faculty are provided with opportunities, resources, and support for professional growth and innovation.

### Accreditation Standard 4.2 — Faculty

## Educational Policy 4.3 — Administrative and Governance Structure

Social work faculty and administrators, based on their education, knowledge, and skills, are best suited to make decisions about the delivery of social work education. Faculty and administrators exercise autonomy in designing an administrative and leadership structure that reflects and affirms respect for anti-racism, diversity, equity, and inclusion. Faculty develop curriculum and formulate and implement policies that support the education of culturally competent social workers.

Administrative sufficiency includes distribution of resources across program options and program levels, and numbers of students enrolled in social work programs and registered in field practicum, modalities, and locations in order to carry out the program’s mission. In recognition of the importance of field education as the signature pedagogy, programs implement administrative structures for the field program that provide adequate and equitable resources, based on the number of students in field practicum, for systematically designing, supervising, coordinating, and evaluating the quality of the field education curriculum within all program options.

## Educational Policy 5.0 — Assessment

Assessment is an integral component of competency-based education and continuous programmatic improvement. Assessment involves the systematic gathering of data that serve as evidence of student learning outcomes; anti-racism, diversity, equity, and inclusion (ADEI); and program outcomes through demonstration of the nine social work competencies at both the generalist and specialized levels of practice. Assessment reflects the intentional and continuous improvement that is anchored in competency-based research, student learning outcomes, student learning experience feedback, professional practice community, and higher education practices.

Assessment of student learning outcomes is best done while students are engaged in practice tasks or activities that approximate social work practice as closely as possible. Practice often requires the demonstration of multiple competencies simultaneously; therefore, assessment of those competencies is optimally carried out at the same time.

Programs assess students' demonstration of the nine social work competencies through the use of multiple and effective assessment methods. Effective assessment incorporates internal and external input relevant to the knowledge, values, skills, and cognitive and affective processes that students have developed and demonstrated and uses recognized methods of evaluating explicit and implicit criteria. Field education curriculum data are included in the overall data collection methods that will help programs make decisions about the delivery of social work education.

Assessment also involves gathering data about the implicit curriculum, with a particular focus on the program's efforts to foster ADEI in the student learning environment. Data from ADEI assessment continuously inform and promote change in the explicit curriculum and the implicit curriculum to enhance attainment of nine social work competencies.

Program outcomes are assessed as evidenced by the program's graduation rates and at least one additional outcome. Data related to program outcomes are used to foster ongoing program evaluation, informing decision making for continuous program improvement.

Assessment information is used to guide student learning, assess student outcomes, assess and improve effectiveness of the curriculum and program overall, and strengthen the assessment methods used. Program assessment methods and data are transparent and publicly available. Data are recent and presented clearly for stakeholders to make informed decisions about the program.

## Accreditation Standard 5.0 — Assessment

**Accreditation Standard 5.0.1(a):** The program has a systematic plan for ongoing assessment of student achievement of the nine social work competencies (and any additional competencies added by the program) of generalist practice for baccalaureate social work programs and of generalist and specialized practice for master's social work programs. The program assesses each competency, using at least two instruments, at least one of which is based in real or simulated demonstration of student achievement in field education. The instruments, the expected level of achievement for each instrument, and the expected level of achievement for each competency are determined by the program. Student competence must be assessed by program faculty or field personnel.

# GLOSSARY

This glossary defines uncommon words within the EPAS. Commonplace words and academic nomenclature may not be defined. In such cases, the BOA accepts commonplace definitions.

## Accreditation

A system for recognizing educational institutions and professional programs affiliated with those institutions for a level of performance and integrity based on review against a specific set of published criteria or standards. The process includes the submission of a self-study document that demonstrates how standards are being met, an onsite review by a selected group of peers, and a decision by an independent board or commission that either grants or denies accredited status on the basis of how well the standards are met.

## Anti-oppression

Strategies, theories, actions, and practices that actively challenge systems of oppression on an ongoing basis in one's daily life and in social justice/change work. Anti-oppression work seeks to recognize the oppression that exists in our society and attempts to mitigate its effects and eventually equalize the power imbalance in our communities. Oppression operates at different levels (from individual to institutional to cultural) and so anti-oppression must as well.

*Related Standards:* [AS 1.0.1](#); [AS 2.0.1](#); [AS 5.0.2\(a\)](#); [AS 5.0.2\(d\)](#)

## Anti-racism

A process of actively identifying and opposing racism. The goal of anti-racism is to challenge racism and actively change the policies, behaviors, and beliefs that perpetuate racist ideas and actions.

*Related Standards:* [AS 1.0.1](#); [AS 2.0.1](#); [AS 5.0.2\(a\)](#); [AS 5.0.2\(d\)](#)

## Approving Field Education Settings

Selecting and forming an educational partnership with qualified agencies/organizations that will host social work students and provide competency-based learning.

*Related Standards:* [AS 3.3.4](#)

## Area of Specialized Practice

An umbrella term. Programs may elect to use other terminology (e.g., specialization, concentration, track, focus, area) to label their area(s) of specialized practice.

*Related Standards:* [AS M3.2.1](#)

## Articulation

Ways the program conveys information via written communication means (e.g., documents, manuals, handbooks, syllabi, platforms and/or websites, presentations, orientation, training).

*Related Standards:* [AS 3.3.3](#); [AS 3.3.4](#); [AS 3.3.5](#); [AS B3.3.6](#); [AS M3.3.6](#); [AS 3.3.7](#); [AS B4.1.2](#); [AS M4.1.2](#); [AS 4.1.3](#); [AS 4.1.4](#); [AS 4.1.5](#); [AS 4.1.6](#); [AS 4.1.7](#); [AS 4.1.8](#)

## Behaviors

Observable actions that demonstrate an integration of knowledge, values, skills, and cognitive and affective processes. Observable components of the competency which operationalize the competency in *real or simulated practice* (e.g., field settings).

*Related Standards:* [AS 3.1.2](#); [AS M3.2.1](#); [AS M3.2.4](#); [AS 3.3.3](#); [AS 5.0.1\(a\)](#)

## Benchmark

The percentage of students the program wants to achieve it program outcomes.

*Related Standards:* [AS 5.0.3](#)

## Clients and Constituents

Those served by social workers, including individuals, families, groups, organizations, and communities.

*Related Standards:* [AS 3.3.3](#)

## Cognitive and Affective Processes

Critical thinking is an intellectual, disciplined process of conceptualizing, analyzing, evaluating, and synthesizing multiple sources of information generated by observation, reflection, and reasoning. Affective reactions are the ways in which our emotions influence our thinking and subsequently our behavior. Exercise of judgment is the capacity to perceive and discern multiple sources to form an opinion (pg. 7 of the [EPAS](#)). This is one dimension and must not be separated into two distinct dimensions for accreditation purposes.

*Related Standards:* [AS 3.1.2](#); [AS M3.2.1](#); [AS M3.2.4](#); [AS 5.0.1\(a\)](#)

## Competency-Based Education

Rests upon a shared view of the nature of competence in professional practice. Social work competence is the ability to integrate and apply social work knowledge, values, and skills to practice situations in a purposeful, intentional, and professional manner to promote human and community well-being. EPAS recognizes a holistic view of competence; that is, the demonstration of competence is informed by knowledge, values, skills, and cognitive and affective processes that include the social worker's critical thinking, affective reactions, and exercise of judgment in regard to unique practice situations. Overall professional competence is multi-dimensional and composed of interrelated competencies. An individual social worker's

competence is seen as developmental and dynamic, changing over time in relation to continuous learning (pg. 7 of the [EPAS](#)).

*Related Standards:* [AS 3.1.1](#); [AS M3.2.3](#)

## **Competency-Based Education Framework**

A framework where the focus is on the assessment of student learning outcomes (assessing students' ability to demonstrate the competencies identified in the educational policy) rather than on the assessment of inputs (such as coursework and resources available to students).

*Related Standards:* [AS 3.1.1](#)

## **Context**

Program context encompasses the needs and opportunities of practice communities, which are informed by their historical, political, economic, environmental, social, cultural, demographic, institutional, local, regional, and global contexts and by the ways they elect to engage these factors. Additional factors include new knowledge, technology, and ideas that may have a bearing on contemporary and future social work education, practice, and research.

*Related Standards:* [AS 1.0.2](#)

## **Course Credit**

Hours granted by the institution and social work program. Course credit does not refer to specific elements, activities, or assignments within an individual course.

*Related Standards:* [AS 4.1.5](#)

## **Curriculum**

All planned educational experiences under the direction of the social work program that facilitates student attainment of competencies. Social work curricula include supervised field education learning experiences.

*Related Standards:* [AS 3.1.1](#); [AS M3.2.3](#); [AS 4.3.2](#)

## **Curriculum Design**

Identifies the elements of the curriculum and states their relationships to each other. A design must be supported with a curriculum rationale to establish the means for competency attainment within the organization in which it operates.

*Related Standards:* [AS 3.1.1](#); [AS M3.2.3](#)

## **Degree from CSWE-Accredited Master's Program**

Degrees from CSWE-accredited programs or recognized through CSWE's International Social Work Degree Recognition and Evaluation Service or covered under a memorandum of understanding with international social work accreditors.

*Related Standards:* [AS B4.2.1](#); [AS M4.2.1](#)

## **Diversity**

The presence of differences that may include age, caste, class, color, culture, disability and ability, ethnicity, gender, gender identity and expression, generational status, immigration status, legal status, marital status, political ideology, race, nationality, religion and spirituality, sex, sexual orientation, and tribal sovereign status.

*Related Standards:* [AS 1.0.1](#); [AS 2.0.1](#); [AS 5.0.2\(a\)](#); [AS 5.0.2\(b\)](#)

## **Due Process**

Appeals and grievance processes.

*Related Standards:* [AS 4.1.7](#)

## **Employment rate**

Percentage of graduates who are employed within the program's identified timeframe. Data are reported for each program option and in aggregate, including all program options. The benchmark for employment rates is determined by the program.

*Related Standards:* [AS 5.0.3](#)

## **Environmental Justice**

Environmental justice occurs when all people equally experience high levels of environmental protection, and no group or community is excluded from the environmental policy decision-making process or is affected by a disproportionate impact from environmental hazards. Environmental justice affirms the ecological unity and the interdependence of all species, respect for cultural and biological diversity, and the right to be free from ecological destruction. This includes responsible use of ecological resources, including the land, water, air, and food. (Adapted from CSWE Commission for Diversity and Social and Economic Justice and Commission on Global Social Work Education Committee on Environmental Justice, 2015).

*Related Standards:* [AS 1.0.1](#)

## **Equity**

Fair treatment, access, opportunity, and advancement, recognizing that all people do not all start from the same place. Equity is achieved by promoting justice, impartiality, and fairness within the procedures, processes, and distribution of resources by institutions or systems. Actively addressing equity issues requires understanding the root causes of outcome disparities in our society and making adjustments to imbalances.

*Related Standards:* [AS 2.0.1](#); [AS 4.1.1](#); [AS 4.1.8](#); [AS 4.3.3](#); [AS 4.4.5](#); [AS 5.0.2\(a\)](#)

## Explicit Curriculum

The program's design and delivery of formal education to students, and it includes the curriculum design, courses, course content, and field education curriculum used for each of its program options. (EP 3.0, pg. 17 of the [EPAS](#)).

*Related Standards:* [AS 2.0.1](#)

## Faculty

Full- and part-time faculty inclusive of all ranks such as tenure, tenure-track, adjunct, lecturer, etc.

*Related Standards:* [AS 4.1.6](#); [AS B4.2.1](#); [AS M4.2.1](#); [AS 4.2.2](#); [AS B4.2.3](#); [AS M4.2.3](#); [AS 4.3.2](#); [AS 4.3.3](#)

## Field Education Hours

Hours accrued through activities that enhance student social work competence, including field supervision, field seminar meeting time, and real-time encounters with clients and constituencies through in-person and technology-supported interactions in the field setting.

*Related Standards:* [AS 3.3.3](#)

## Field Instructor

Qualified individual that provides field supervision at the field setting or through alternative supervision arrangements.

**Related definition:** Field supervision

*Related Standards:* [AS B3.3.6](#); [AS M3.3.6](#)

## Field Personnel

Any individuals that facilitate the field education experience. This may include, yet is not limited to, the field director (regardless of their formal title), field liaisons, and field instructors/supervisors.

*Related Standards:* [AS 3.3.3](#); [AS 3.3.5](#); [AS B3.3.6](#); [AS M3.3.6](#); [AS 5.0.1\(a\)](#)

## Field Supervision

Structured planning, organizing, leading, and supporting student learning at field settings provided by a qualified field instructor.

**Related definition:** Field instructor

*Related Standards:* [AS 3.3.7](#)

## **Fringe**

Any extra benefits supplementing an employee's salary (e.g., the full compensation package, which may include retirement contributions, insurance, tuition reimbursement, employee meal plans).

*Related Standards:* [AS 4.4.1](#)

## **Full-time Equivalent (FTE)**

The institution's calculation of full-time faculty and students. Programs should calculate ratios that include full- and part-time faculty (not field instructors in field settings) and full- and part-time students in the full-time equivalency calculation.

*Related Standards:* [AS B4.2.3](#); [AS M4.2.3](#)

## **Generalist Practice**

Generalist practice is grounded in the liberal arts and the person-in-environment framework. To promote human and social well-being, generalist practitioners use a range of prevention and intervention methods in their practice with diverse individuals, families, groups, organizations, and communities, based on scientific inquiry and best practices. The generalist practitioner identifies with the social work profession and applies ethical principles and critical thinking in practice at the micro, mezzo, and macro levels. Generalist practitioners engage diversity in their practice and advocate for human rights and social, racial, economic, and environmental justice. They recognize, support, and build on the strengths and resiliency of all human beings. They engage in research-informed practice and are proactive in responding to the impact of context on professional practice. (EP 3.1, pg. 17 of the [EPAS](#)).

*Related Standards:* [AS 3.1.1](#); [AS 3.1.2](#); [AS M3.2.2](#); [AS 3.3.1](#); [AS 5.0.1\(a\)](#)

## **Graduation rate**

Percentage of students who graduate the program per academic year. Data are reported for each program option and in aggregate, including all program options. The benchmark for graduation rates is determined by the program.

*Related Standards:* [AS 5.0.3](#)

## **Higher education acceptance rate**

Percentage of graduates who are accepted into higher education, including master's and doctoral programs of any discipline, within the program's identified timeframe. Data are reported for each program option and in aggregate, including all program options. The benchmark for higher education acceptance rates is determined by the program.

*Related Standards:* [AS 5.0.3](#)

## Implicit Curriculum

Consists of the student learning experience and the program context or environment. The implicit curriculum includes the following elements: student development, admissions, advising, retention, and termination; student participation in governance; faculty; administrative and governance structure; and resources. All elements of the implicit curriculum are expected to demonstrate the program's commitment to anti-racism, diversity, equity, and inclusion (ADEI). The student learning experience and environment are as important as the academic curriculum in shaping the professional character and competence of the program's graduates (**EP 4.0**, pg. 24 of the [EPAS](#)).

*Related Standards:* [AS 2.0.2](#); [AS 4.1.8](#); [AS 5.0.2\(a\)](#); [AS 5.0.2\(b\)](#)

## Inclusion

The act of creating environments in which individuals and groups are engaged, respected, valued, and supported through the elimination of practices and behaviors that result in marginalization. Inclusion is achieved when all people are welcomed to fully participate.

*Related Standards:* [AS 2.0.1](#); [AS 4.1.1](#); [AS 4.1.8](#); [AS 4.3.3](#)

## Interprofessional Education

Occurs when students from two or more professions learn about, from, and with each other to enable effective collaboration and improve health outcomes. Once students understand how to work interprofessionally, they are ready to enter the workplace as a member of the collaborative practice team. This is a key step in moving health systems from fragmentation to a position of strength. (World Health Organization. [2010]. Framework for action on interprofessional education & collaborative practice.)

*Related Standards:* [AS 3.1.1](#); [AS M3.2.1](#)

## Intersectionality

A paradigm for understanding social identities and the ways in which the breadth of human experience is shaped by social structures.

*Related Standards:* [AS 2.0.1](#); [AS 5.0.2\(a\)](#); [AS 5.0.2\(b\)](#)

## Knowledge

Generally includes learning the competencies and social work concepts.

*Related Standards:* [AS 3.1.2](#); [AS M3.2.1](#); [AS M3.2.4](#); [AS 5.0.1\(a\)](#)

## Matrix

A table or chart that maps the social work curriculum content to the competencies.

*Related Standards:* [AS 3.1.2](#); [AS M3.2.4](#)

## **Nine Social Work Competencies**

Listed on pgs. 8-12 of the [EPAS](#).

*Related Standards:* [AS 3.1.2](#); [AS M3.2.4](#)

## **Opportunities**

Possibilities typically documented in procedures/steps.

*Related Standards:* [AS 4.1.8](#)

## **Orienting Students**

Introductory programming for new students.

*Related Standards:* [AS 3.3.5](#)

## **Placing Students**

Matching students with a qualified field setting that will co-facilitate their competency-based learning. The program facilitates the student and field setting forming an educational partnership.

*Related Standards:* [AS 3.3.5](#)

## **Policy**

A rule or regulation. Written/published policy available to stakeholders. Ensures continuity/consistency.

*Related Standards:* [AS 4.1.7](#)

## **Post-Social Work Degree Practice Experience**

The minimum requirement of two years post-degree social work practice experience is calculated in relation to the total number of hours of full-time and equivalent professional practice experience. Social work practice experience is defined as providing social work services to individuals, families, groups, organizations, or communities. Social work services can include work in professional social work auspices under the supervision of professional social work supervisors, volunteer practice experience in a social service agency, and paid experience as a consultant in the areas of the individual's practice expertise. It does not include academic appointments.

*Related Standards for Post-baccalaureate or Post-master's Social Work Degree Practice Experience:* [AS B3.3.6](#); [AS B4.3.5\(b\)](#)

*Related Standards for Post-master's Social Work Degree Practice Experience:* [AS M3.3.6](#); [AS B4.2.1](#); [AS M4.2.1](#); [AS 4.2.2](#); [AS M4.3.5\(b\)](#)

## Principal Assignment

Faculty identified in response to this standard are required to have a full-time overall appointment to social work with principal assignment (51% or more) of their appointment dedicated solely to the social work program for which the program is seeking accreditation. The remainder of the identified faculty's time may be dedicated to teaching, administration, research, service, or other roles. Faculty identified in response to this standard may have an appointment outside social work.

*Related Standards:* [AS B4.2.1](#); [AS M4.2.1](#)

## Process

A series of actions or steps to achieve an outcome, which may include written policies, criteria and procedures.

*Related Standards:* [AS 3.3.4](#)

## Professional Advising

Professional advising typically focuses on postgraduation preparation for entry into the profession, which could include: career counseling services, career development guidance, professional coaching, field education supports, licensing preparation, interviewing tips, career materials preparation (e.g., resumes, portfolios, or cultivating online professional presence such as a LinkedIn profile), facilitate networking or connecting students to informational interviews, provide guidance to prepare research, publications, or presentations at professional conferences, give feedback and direction to prepare a final product (e.g., thesis, dissertation), offer professional development resources, or employment placement assistance.

*Related Standards:* [AS 4.1.6](#)

## Professional Performance

Criteria may include adhering to an educational or professional code of conduct, code of ethics, or behavioral expectations in the field setting, classroom, or community.

*Related Standards:* [AS 4.1.7](#)

## Program Options

Various structured pathways to degree completion by which social work programs are delivered, including face-to-face, online, branch or satellite campus, broadcast site, and correspondence. Refer to policy 4.9 *Program Changes* in the [Accreditation Policy Handbook](#) for program option definitions.

*Related Standards:* All

## Program Outcomes

For CSWE-accredited programs, examples include employment rates, graduation rates, higher education acceptance rates, and time to program completion. Programs are required to monitor graduation rates and at least one additional program outcome. Data are reported for each program option and in aggregate, including all program options.

*Related Standards:* [AS 5.0.3](#)

## Purpose

The purpose of the social work profession is to promote human and community well-being. Guided by a person-in-environment framework, a global perspective, respect for human diversity, and knowledge based on scientific inquiry, the purpose of social work is actualized through its quest for social, racial, economic, and environmental justice; the creation of conditions that facilitate the realization of human rights; the elimination of poverty; and the enhancement of life for all people, locally and globally (**EP 1.0**, pg. 14 of the [EPAS](#)).

*Related Standards:* [AS 1.0.1](#)

## Rationale

Reasons or logical basis.

*Related Standards:* [AS 3.1.1](#); [AS M3.2.3](#); [AS 5.0.3](#)

## Recognized Regional Accrediting Organization

The regional accrediting organizations are identified in the [Council for Higher Education Accreditation \(CHEA\) directory](#).

*Related Standards:* [AS M4.1.2](#)

## Retention

Incentivizing and reducing barriers to faculty continuing employment with the program/institutions.

*Related Standards:* [AS 4.3.3](#)

## Signature Pedagogy

Forms and styles of teaching and instruction that are central to a specific discipline, area of study, or profession that help students build a habit of mind that allows them to think and act in the same manner as experts in the field. Field education is the signature pedagogy for social work.

*Related Standards:* [AS 3.3.1](#)

## **Simulated Practice Situations**

Modalities that replicate real practice situations to facilitate the demonstration of student competence.

*Related Standards:* [AS 5.0.1\(a\)](#)

## **Skills**

Generally include the ability to apply or demonstrate competencies and social work concepts.

*Related Standards:* [AS 3.1.2](#); [AS M3.2.1](#); [AS M3.2.4](#); [AS 5.0.1\(a\)](#)

## **Specialized Practice**

Builds on generalist practice, as described in Educational Policy 3.2, by integrating the nine social work competencies (and any additional competencies added by the program) that manifest in holistic professional practice. Specialized practitioners extend social work knowledge, values, skills, and cognitive and affective processes, and demonstrate an ability to engage, assess, intervene, and evaluate across client populations, problem areas, and methods of intervention (EP M3.2, pg. 18 of the [EPAS](#)).

*Related Standards:* [AS M3.2.1](#); [AS M3.2.2](#); [AS M3.2.3](#); [AS M3.2.4](#)

## **Student Financial Aid**

Any student financial support expensed by the social work program that help make education more affordable (e.g., which may include scholarships, grants, stipends, work-study, loans, funds).

*Related Standards:* [AS 4.4.1](#)

## **Student Learning Outcomes**

The stated behaviors, knowledge, values, skills, and cognitive and affective processes that students are expected to demonstrate as a result of engagement in the explicit and implicit curriculum.

*Related Standards:* [AS 5.0.1\(a\)](#)

## **Technological Access**

How program students, faculty, and staff use technology to access and complete the educational program, usually virtually or remotely. This includes technology, software, or platforms that facilitate learning and human communication through computers. Examples include: Devices, platforms, technology, learning management systems, shared networks, collaborative tools, online repositories/resources, etc.

*Related Standards:* [AS 4.4.4](#)

## Technological Resources

Any technology expensed by the social work program (e.g., which may include machinery, equipment, platforms, applications).

*Related Standards:* [AS 4.4.1](#)

## Technology Support

Technical assistance offered to students, faculty, and staff. Examples include: Troubleshooting, information technology (IT) professional support, oversight of hardware and software, and maintenance and repair of technology.

*Related Standards:* [AS 4.4.4](#)

## Time to Program Completion

Percentage of students who completed the program within the program's identified time period. Data are reported for each program option and in aggregate, including all program options. The completion time period and the benchmark for completion rates are determined by the program consistent with the program's context. Context includes the needs and opportunities associated with the setting and program options, local hiring practices, and historical, political, economic, environmental, social, cultural, demographic, local, regional, and global factors.

*Related Standards:* [AS 5.0.3](#)

## Transfer of Credits

The process of awarding student credit for social work courses earned at another institution before admission to the social work program. The accreditation process respects the institution's policies concerning the transfer of credits. However, programs may accept field education and practice course transfer credits only from other CSWE-accredited or candidate social work programs, unless the program is able to explain how the program assesses course equivalency to comply with all field education standards and practice course instructor qualifications in the EPAS.

*Related Standards:* [AS 4.1.4](#)

## Values

Service, social justice, the dignity and worth of the person, the importance of human relationships, integrity, competence, human rights, and scientific inquiry are among the core values of social work. These values, along with an anti-racist and anti-oppressive perspective, underpin the explicit and implicit curriculum and frame the profession's commitment to respect all people and the quest for social, racial, economic, and environmental justice (**EP 1.0**, pg. 14 of the [EPAS](#)).

*Related Standards:* [AS 1.0.1](#); [AS 3.1.2](#); [AS M3.2.1](#); [AS M3.2.4](#); [AS 5.0.1\(a\)](#)
