| Criteria | Literature Review Content |
|---|---|
| **Authors, Year** | **Column 1:** This column must include all author's last names only with the year of the article publication using correct APA format (e.g., Smith & Jones, 2022). Note: Last names should be in the order written in research article. |
| **Purpose of Study; Keywords, Acronyms of Terms and Meanings** | **Column 2:** Capture the *why* of the study and clarify terminology. State the research aim/purpose; identify the keywords-usually at the end of the abstract; list common acronyms and spell out meanings (if applicable). |
| **Methodology & Data Analysis** | **Column 3:** Critically assess rigor of methodology and appropriateness of analysis. Describe research design (qualitative, quantitative, mixed methods); identity sampling selection strategy; summarize data collection tools (surveys, interviews, archival data, etc.); explain analytic techniques (e.g., thematic analysis, regression, ANOVA). |
| **Conclusions & Implications** | **Column 4:** Evaluate the strength of conclusions and practical relevance. Summarize main findings; discuss implications for practice, policy, or future research directions; Note limitations or gaps in research. Critical thinking skill: How will this study inform social work theory, practice, policy, or education? |
| **Competency Alignment** | **Column 5:** Explicitly connect the article to CSWE Social Work Competencies-using EPAS 2022 only (e.g., C4: Research Informed Practice, C5: Policy Practice). Critical thinking skill: How does this study align with CSWE, EPAS 2022 Competencies? |
